Soft Skills: Responsive Web Design, Data Structures, Algorithms Version Control Systems, Cross-browser compatibility, Web Performance Optimization, Object Oriented Programming, Knowledge of RESTful APIs, Understanding of UX/UI principles, Problem-solving skills, Attention to detail, Teamwork & Collaboration

Education

University of Ilorin, Kwara State, Nigeria.
B.sc in Industrial Chemistry, First Class Hons

October 2023
4.50/5.00

Work Experience

Freelance Web Developer (Remote)

December 2024 – Present

- Designed and developed responsive, user-friendly websites for a diverse range of clients using HTML, CSS, JavaScript, and React.
- Built scalable full-stack applications with Next.js, Node.js, and MongoDB to meet client requirements.
- Collaborated with clients to understand their needs, provide regular updates, and deliver high-quality solutions on time.
- Optimized website performance, ensuring fast load times and cross-browser compatibility.
- Integrated APIs for enhanced functionality, including payment gateways and third-party services.

OTS Tech Solutions – Lagos, Nigeria (Web Developer Intern)

November 2023 – November 2024

- Built responsive web pages with React, ensuring compatibility across different browsers and devices, and contributed to server-side logic using Node.js and Express for backend implementation
- Conducted debugging and resolved issues to enhance application performance.
- Managed data integration and storage using MongoDB, ensuring efficient handling and retrieval of data.
- Gained hands-on experience of industry best practices and developed strong understanding of web technologies

HNG Tech (Frontend Developer Internship)

May 2023 – August 2023

- Participated in code reviews and provided constructive feedback to peers.
- Assisted in designing and developing user interfaces using HTML, CSS, and JavaScript.
- Collaborated with UI/UX experts on improving user interfaces and experiences, implementing best practices for accessibility and performance optimization

Meriskill (Junior Frontend Developer Intern)

February 2023 – April 2023

- Worked closely with experienced senior developers, I collaborated on frontend libraries and translated static design concepts into dynamic, functional components.
- Acquired proficiency in utilizing Git to enhance the development workflow and promote productive teamwork.

PROJECTS

Mealsprint | React, Redux, Express.js, Node.js, Mongo Database, S3 Bucket, Tailwind CSS June 2024 - August 2024

A fully functioning food delivery web application. [-Visit](#)

- Developed and maintained a high-performance e-commerce platform offering diverse meal options with fast delivery.
- Integrated automated email notifications for order confirmation and delivery updates.
- Ensured security best practices by applying data validation, sanitization, and secure payment handling.
- Integrated Stripe payment intent to securely process payments for meal orders.
- Designed and built a fully functional user profile page, allowing users to update their profile picture, manage passwords, track orders, and view order history.
- Optimized both front-end and back-end performance, ensuring efficient real-time order tracking and a smooth user experience.

Shoe haven | React, Node JS, Mongo Database, S3 Bucket, Tailwind CSS

March 2024 - June 2024

A fully functioning shoe e-commerce website. [-Visit](#)

- Implemented Google Authentication as an alternative for user sign-up and sign-in, enhancing convenience and security.
- Integrated Stripe Checkout to enable seamless and secure payment processing.
- Developed a comprehensive user profile page where users can update their profile picture, manage passwords, and view order history.
- Enabled a newsletter subscription feature, allowing users to stay updated with the latest offers and news.
